Blood Donation

PROJECTS

Health Guidance

The project is a mobile application that aims to provide users with a fast and accurate illness prediction based on their symptoms, and make it easier for them to find relevant information about different diseases and specialists in their area.

The application will include features such as symptom analysis, illness prediction, doctor recommendation, and disease information. The target audiences for the application are individuals who are looking for a convenient and efficient way to assess their health and find medical care.

Online hotel booking system

The Online Hotel Booking System is a project implemented for Good Luck Hotel, which is an imaginary hotel. It provides people all Over the world with an easy and fast way to book hotel rooms online.

The interface of the Online Hotel Booking System is Web pages that can be accessed with a Web site browser. The system is implemented in PHP (Hypertext Preprocessor) and HTML (Hyper Text Markup Language).Users can perform room booking activities at Good Luck Hotel anytime and anywhere by accessing it via Internet.

The Online Hotel Booking System is an easy-to-use application. Everyone who knows how to use a Web browser can easily carry out booking, change the booking details, cancel the booking, change the personal profile, view the booking history, or view the hotel information by following its simple and clear GUI (Graphical user interface) design.
